

 DSⁱWare™

1001 CRYSTAL MAZES

Collection

The ultimate
Crystal Puzzle
Challenge!

Give your brain a workout with 1001 Crystal Mazes Collection, the deceptively simple jewel logic game! It's quick to learn but takes a lifetime to master. Your task is to push the crystals forward to their target destinations. However, it's not so simple and needs clever thinking to complete a level. The more advanced a maze is, the more crystals will appear in a labyrinth. Only one element can be moved at a time and you can also push a jewel into a locked or "un-push-able" position, so plan your moves carefully! Over 1000 various logic mazes will challenge your mind and push your brain skills to the limit.

Are you up to
the dare?

FEATURES

- ◆ 1001 mazes to complete
- ◆ A fast preview of all mazes
- ◆ Undo and Redo commands
- ◆ Diverse levels of difficulty
- ◆ Zoom In and Zoom Out
- ◆ Right- and left-handed controls support

RULES

DS⁰Ware™

Over 1000 mazes to choose from

The mazes are presented in a 2D form, with a camera set above the maze. A coin with an image of a girl or a boy, shows a player's current position. It can be moved using both a directional pad or a stylus (by touching arrows visible on the touch screen). The more advanced a maze is, the more jewels appear in the labyrinth.

Push jewels towards their target destinations

The player can push a crystal in front of him when he moves. Only one element can be moved at a time and positions of walls cannot be changed. When a crystal is pushed in a corner or two of them are aligned next to each other alongside a wall, they can no longer be moved - it's game over.
